

LAT PULLDOWN / MID ROW

The DEFINITION GYMS series is specifically designed for large commercial fitness clubs, characterized by its sturdy durability, biomechanical structure, comprehensive functionality, and high safety standards. This series offers equipment that is not only built to last but also designed in accordance with human biomechanics, ensuring exercises are performed in the most natural and effective way.

LAT PULLDOWN / MID ROW Machine

This dual-function station provides both high pulldown and rowing grips, targeting the core muscles of the back. It mainly exercises the upper trapezius, latissimus dorsi, and biceps brachii. Made with standard commercial-grade materials (1.6inx5.5inx1in square tubing combined with 2inx4inx1in flat oval tubing), it guarantees a secure training environment. The machine weighs 310 lbs with a standard weight stack of 220 lbs, totaling 530 lbs.
